WISH YOU HAPPY LEARNING.

Fellow Dreamer,

First & foremost, I would like to congratulate you on taking the first step towards achieving your dreams We all have different dreams and this is what makes us unique. "May nothing be able to stop you, no mountains, no oceans, may nothing be able to limit you. May sky be your summit, where we have to reach, we all have to reach."

Ethan's Tech is one such experience. Let me explain the vision behind Ethan's Tech. I started Ethan's Tech to fulfill my dream of imparting quality training to my professionals. I have also dreamed of myself as a trainer by passion, a Python programmer and Data Scientist by skill, and a lifelong student by outlook. During the course of my professional career, I realized the significant gap between the academic content taught in schools and colleges, and its practical usage in actual industrial scenarios. This academia-industry mismatch has made people get glued in a career/technology/job, which they either do not enjoy or are unskilled. Education means facilitating the process of developing compassionate skills & qualities in the pupils. Based on these problem statements, I decided to establish Ethan's Tech as a training institute where the primary aim is improving and offering niche technical skills to professionals and students and has established the goodwill as a leader in the industry. Our focus is to ensure that the student develops a thorough understanding of the technology, so that one enjoys his/her job. If you seek a job you love, you will never work again. This led us to evolve our technical courses from scratch, wherein the student was made the center of our project. I remain extremely proud of our institute, but I hold a deep passion for providing students, the opportunity to access the highest standards of holistic education.

I have always believed that, "Excellence is never an accident; it's always the result of high intention, sincere efforts, intelligent direction and skillful execution." I pray that God, in his Divine benevolence continues to guide this prestigious Institution for generations to come.

Be newfangled and just go for it! Remember passion is the clue to all success!!

WHY ETHANS TECH

Ethan's Tech is Excellence Award Winner in Year 2016, 2017 & 2018 in Multiple

Technologies by Urban Pro. Our 56+ Highly experienced faculty from industry has

delivered almost 1600+ days of corporate training and 1100+ Classroom Batches.

WHY CHOOSE US?

- Curriculum Designed By Experts
- Advanced Technologies
- Strong focus on Analytics, Automation and Cloud vertical
- Strong Industry Connection
- Free Open Career Consultation
- Small Batch Size
- Affordable Fees Structure
- Flexi Pass for repeaters
- Connect Talent with Employers

BEST IN CLASS MENTORS

- Best in Class Professional Mentors
- Mentors with 9+ years of experience in the technology they teach.
- Mentors have the ability to transfer knowledge to a diverse audience.
- Ability to engage students with real time examples & case studies.
- Mentors follow easy-to-understand style of presentation.
- Sound technical knowledge in structures and project managemen

FOCUS

Our focus is to spark the student's interest in technology so that learning becomes a fun activity. The students should enjoy the coding process, should be always willing to upgrade their knowledge, should actively participate in hackathons and coding conferences, and should be an active seeker and contributor of knowledge in the open source domain. This is only possible if one has developed a clear understanding of concepts, and has the ability to utilize this knowledge in the practical domain. I promise you that when you complete a course from Ethan's Tech, you will have developed a passion for coding because you will learn to enjoy it.

OUR
COURSES

Analytics

- Python
- Data Science
- Machine Learning
- Artificial Intelligence
- Hadoop
- Tableau

Cloud

- Amazon Web Services (AWS)
- Microsoft Azure (MS Azure)
- Google Cloud Platform (GCP)
- Salesforce
- DevOps
- IBM Cloud

OUR
COURSES

Automation

- Selenium
- Robotics Process Automation
- ETL Testing
- API Testing
- Appium Testing
- UFT

Other Courses

- Angular
- QlikSense
- Blockchain
- Stock Market Trading
- Internet of Things
- UI/UX

OUR
TEACHING
STYLE

EXPERIENTIAL LEARNING

Our programme emphasises on Experiential Learning that allows learners to apply concepts learnt in the classroom in simulated and real work situations. This is achieved through

80% Practical Labs

Theory **20%**

Our rigorous training programme consists of 80% practical class training with labs exercises, assignments and POC's. We prefer hands-on training rather than powerpoint presentations within the class.

Assessment on Learning: The learner performance is assessed continuously throughout the courses using various online platforms such as quiz, assignment and exercise. The assessment results are shared with the learners in a unique ethans format using graphs and plots to improve their performance.
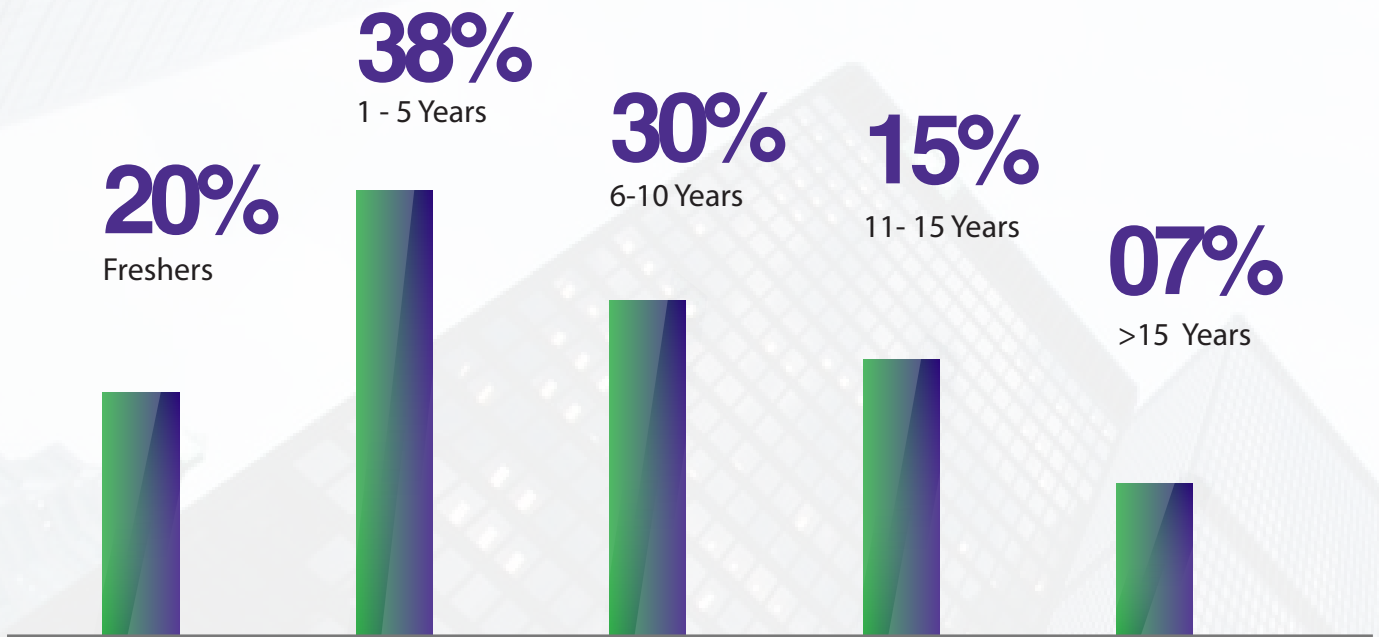

Case Studies and Assignments: Carefully chosen real-world cases & assignments are both discussed and used as problem-solving exercises during the programme

Projects work on real-time environment: Courses we offer provides an opportunity for learners to apply their knowledge gained during the programme to a real world like complex project. The learner is expected to demonstrate understanding of vital principles learnt across topics and their ability to successfully apply these concepts.

Who will be your Mentor: Carefully chosen the world class mentor after conducting multiple rounds of interviews with the trainer. Subject Matter expert, excellent communication and presentation skills, assertiveness and mandatory Ethan's Training program "Train the trainer" helps us to identify the best talent of the market.

TESTIMONIALS

The training is really marvelous and we are about to start a POC that would really help us in implementing the real-time scenarios. Overall the session is good and interactive. Thanks for all the classes organized. I am immensely satisfied with the course content, they offered pre-recorded classes and 8 months post class assistance from experts. I exceptionally recommend Ethans Tech, as it's the best for corporate leanings and all cutting edge technologies/tools/languages.

PRIYANKA TOMAR
(Consultant at Barclays)

The courses are premium and great commandments. Instructors are always there to clear the queries, and prompt when you open an issue if you are having any trouble. Added bonus - you get software, study material, certification of the course you opt for! I have enrolled for so many courses and they always offer the best course each and every time I enrolled. Love these guys. Salute to their service!!

UPENDER NEGI
(Team Lead at Tech Mahindra UK)

Classroom sessions were delightful. Don't have command on Linux and Python, because of that feeling lagging somewhere, would have more wonderful learning, if i had command on those languages. Overall experience is superior for learning.

MD ASHRAF KHAN
(Technical Service Engineer Expert, Fujitsu)

Hi, it was a great and quality experience to get upskilled on Python from Ethans Tech. The program is well designed and the trainer was highly experienced and good at presenting the concepts clearly by presenting real time scenarios. The Admin team is very helpful and they are always available whenever you need any help regarding coding or the software. Therefore, I would highly recommend Ethans Tech.

RENUKA GUDELA PALTERU
(Team Manager at Gallagher)

I am a last year College student and my keen Interest is in Cloud Technology, In Feb'20 - Joined Amazon courses training program from Ethans which gave me 100% Practical Hand-on training along with covered the Programming languages, Big Data Hadoop, AWS, Azure, SQL Database which help me to get prepared for Internship and Job. One of the best Institutes!

ANHADPREET SINGH
(Student at Guru Nanak Dev Engineering College, Ludhiana)

It was a great learning experience from Ethan's teaching Skill is pitched perfectly. The trainers were well Experienced and motivational. They always make sure that each and every student should be crystal clear with every topic, they are always ready to help, this is what helps them offer the best service to their students. Thanks A Bunch Ethans for developing my interest in coding.

GAYATRI SONI
(Intern at Ethans Tech)
